A fast and streamlined way to manage devices
Powered by Apple and DOCOMO PACIFIC

Streamline your device deployment and activation with Apple Business Manager. It works seamlessly with your existing mobile device management* (MDM) solution, saving you time and money.

We all know the power of business mobility. It has revolutionized the way businesses operate, improving communication within the workforce and increasing operational productivity and efficiency. But with this optimization comes an increased threat to your network and data. To protect your mobile organization, you need a deployment solution that manages all your connected devices through defined-user profiles.

Apple Business Manager enables you to automatically enroll corporate-owned iOS and macOS devices in your mobile device management solution, so they can be immediately configured with account settings, apps and access to corporate services upon delivery.

DOCOMO PACIFIC is the **first and only telecommunications provider certified** to issue Apple Device Enrollment Program eligible devices on Guam and the CNMI. No matter what device or platform your organization uses, you can streamline device and security management with DOCOMO PACIFIC.

To enable Apple's Device Enrollment Program through DOCOMO PACIFIC

1. Enroll in Apple Business Manager

2. Purchase an Apple device from DOCOMO PACIFIC, and we will notify Apple to enroll the new device in Apple Business Manager program

Key benefits
Device Enrollment lets you automate Mobile Device Management enrollment and simplify initial device setup. You can streamline device activation without any need for manual configuration.

Device Security
Improves security by loading enterprise controls, applications, and configurations the first time a device is activated

Easy setup
Streamlines setup and deployment of corporate-owned devices - IT can deploy devices in bulk without having to manually configure each device

Save time and money
Reduces time and cost for users and IT - Enrollment and configuration is automated for your corporate devices today and in the future

Device visibility and control
Allows access to "look-back" capability that can enroll and configure existing devices purchased in the last two years

*DOCOMO PACIFIC offers a range of Enterprise Mobility Management solutions designed to help manage and secure mobile devices, applications, and content. Our Mobile Device Management (MDM) platforms are supported by leading vendors, like Cisco Meraki and Microsoft, to help safeguard today's increasingly mobile workforce.
